e1: question emissions in execution order

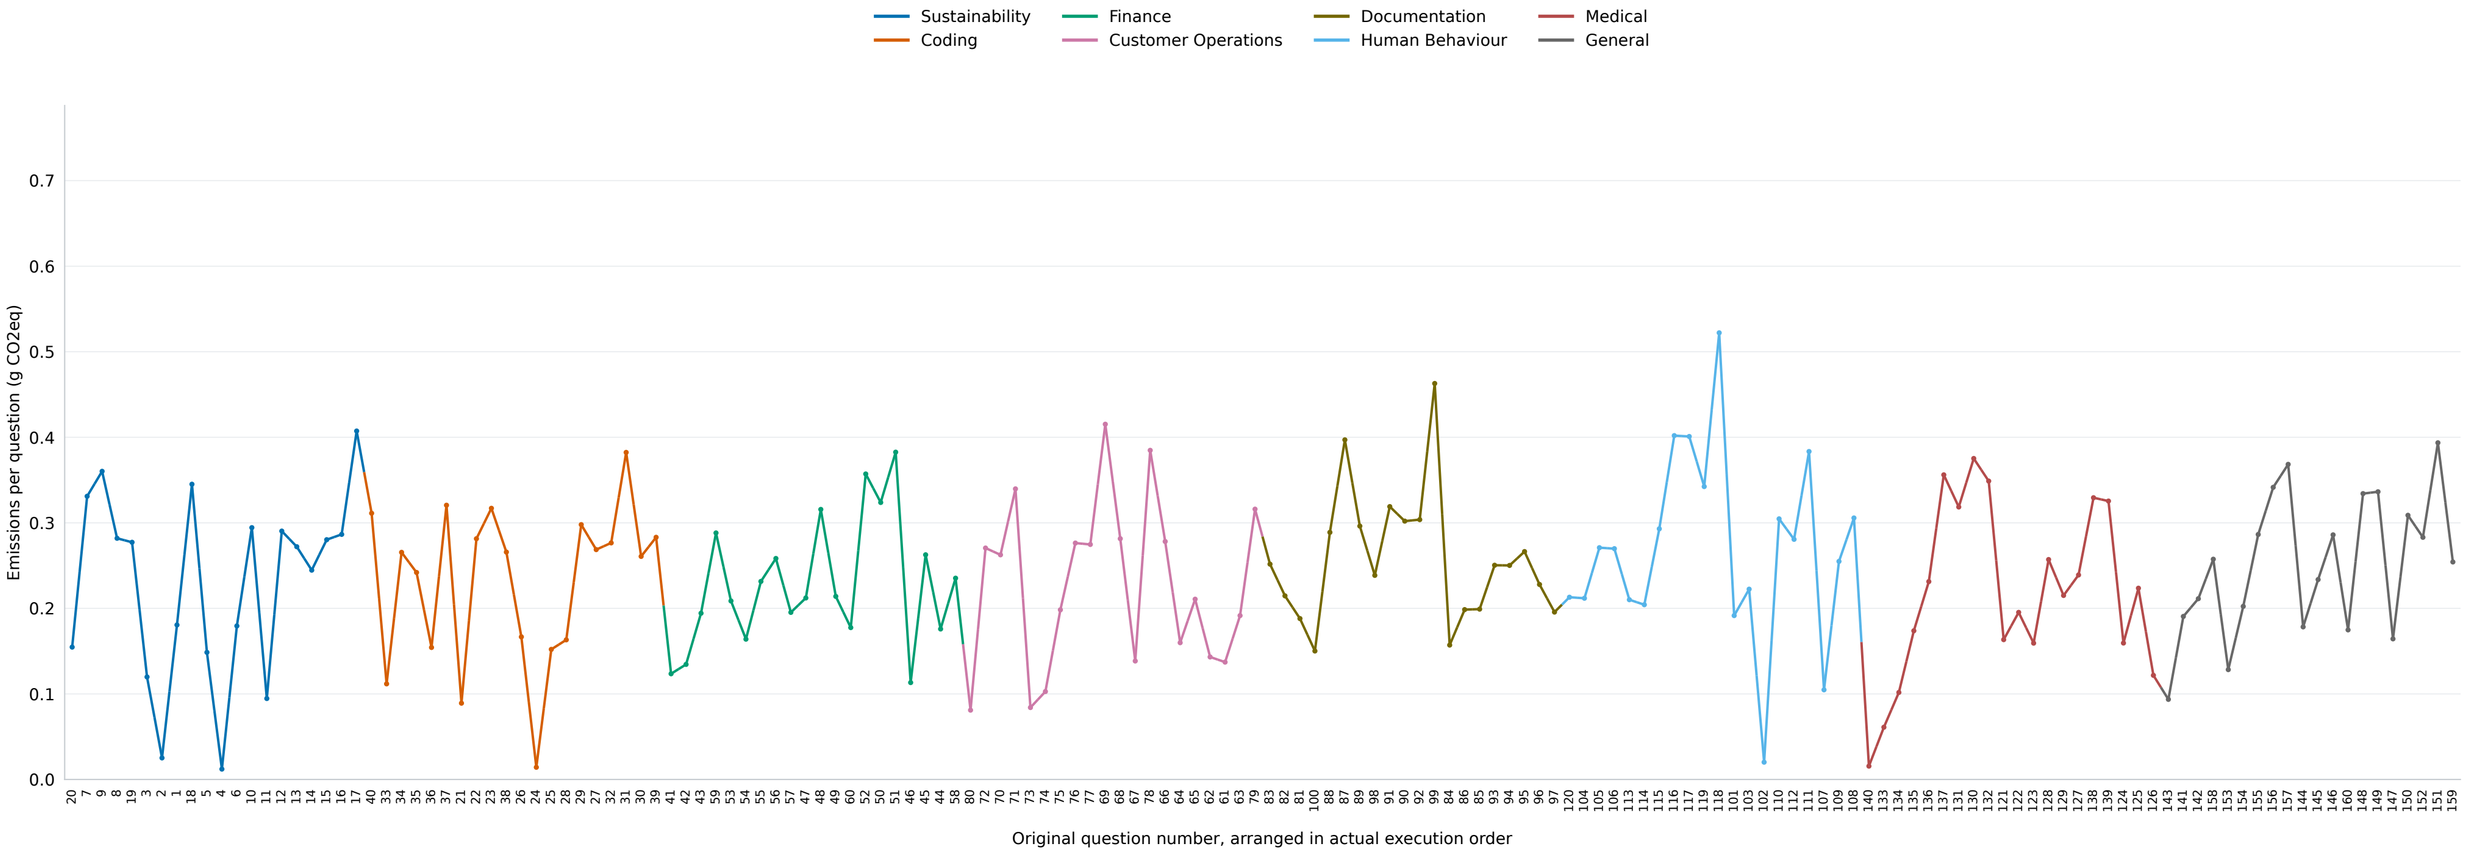

Labels are original questionbank serials (1-160). Colours identify topic sheets; colour changes halfway between neighbouring questions.

e2: question emissions in execution order

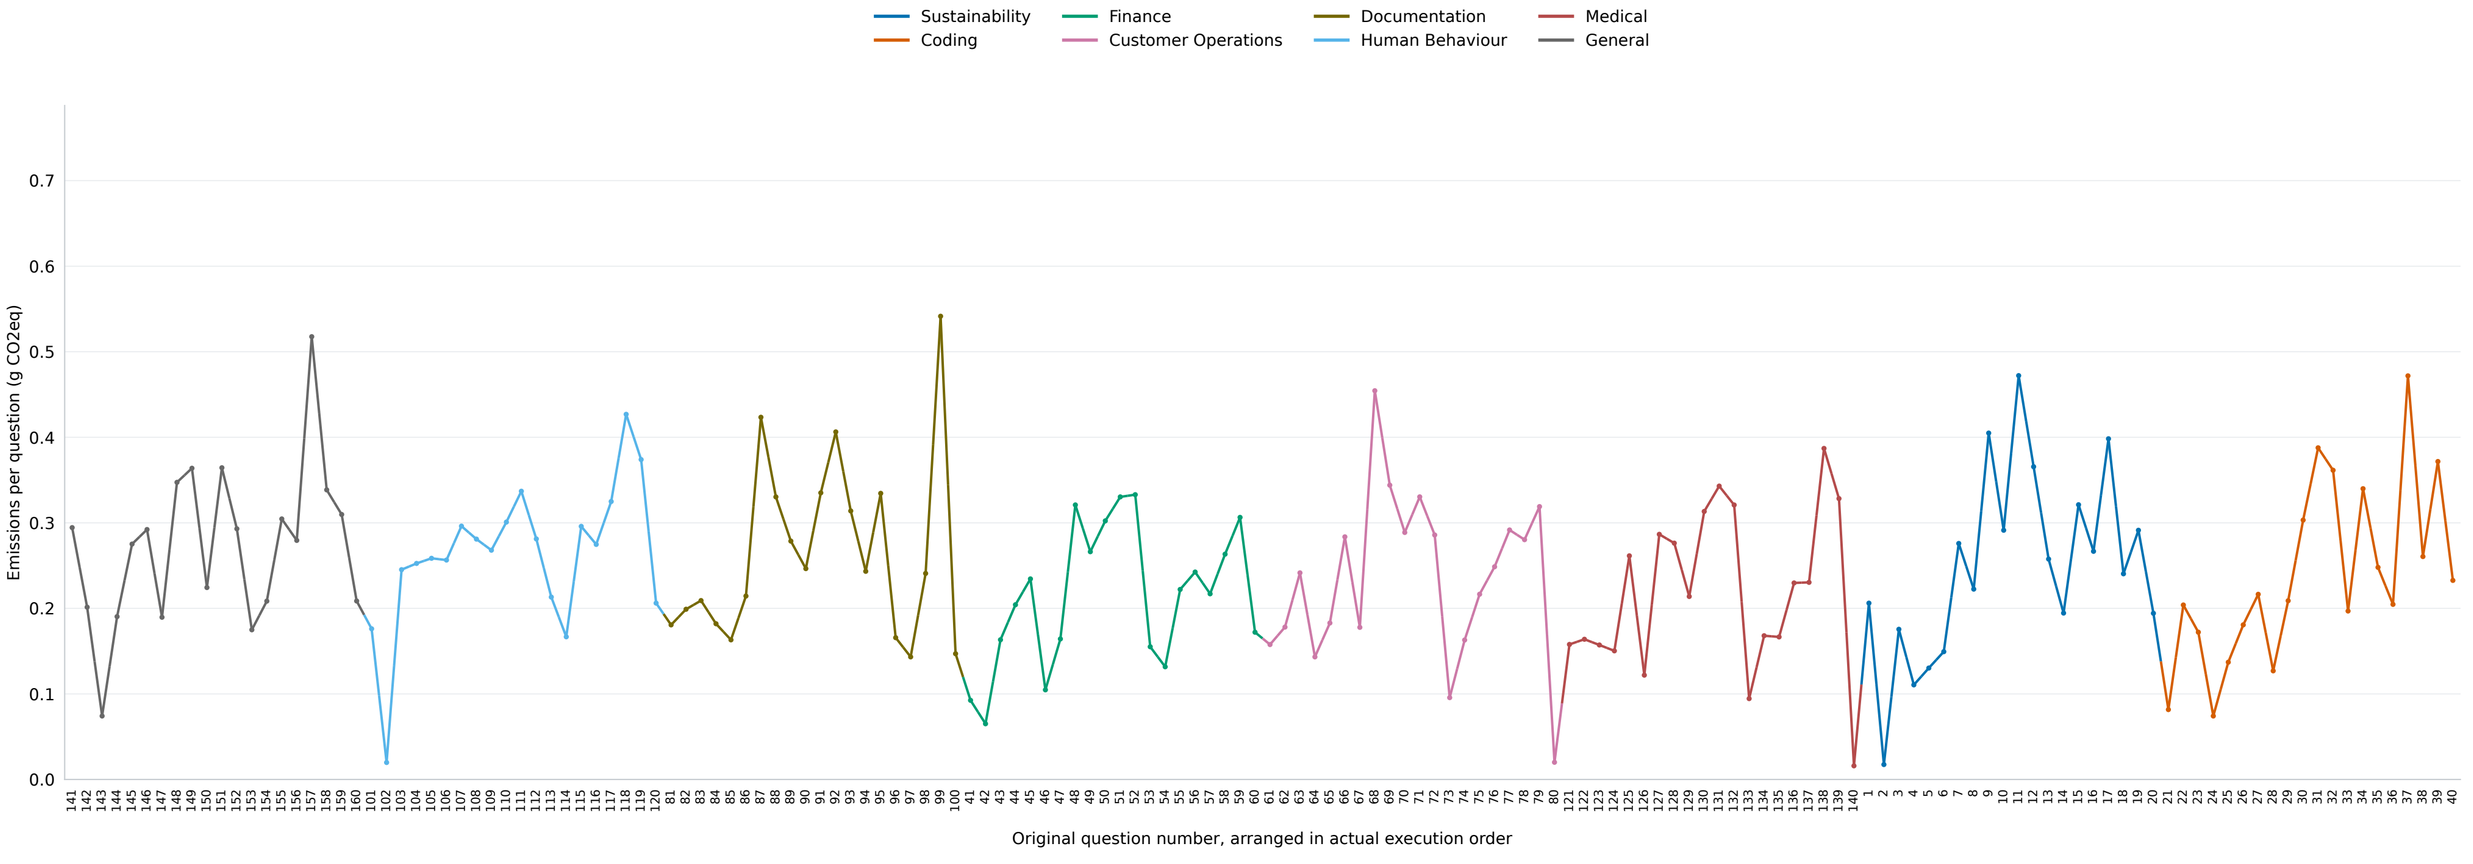

Labels are original questionbank serials (1-160). Colours identify topic sheets; colour changes halfway between neighbouring questions.

e3: question emissions in execution order

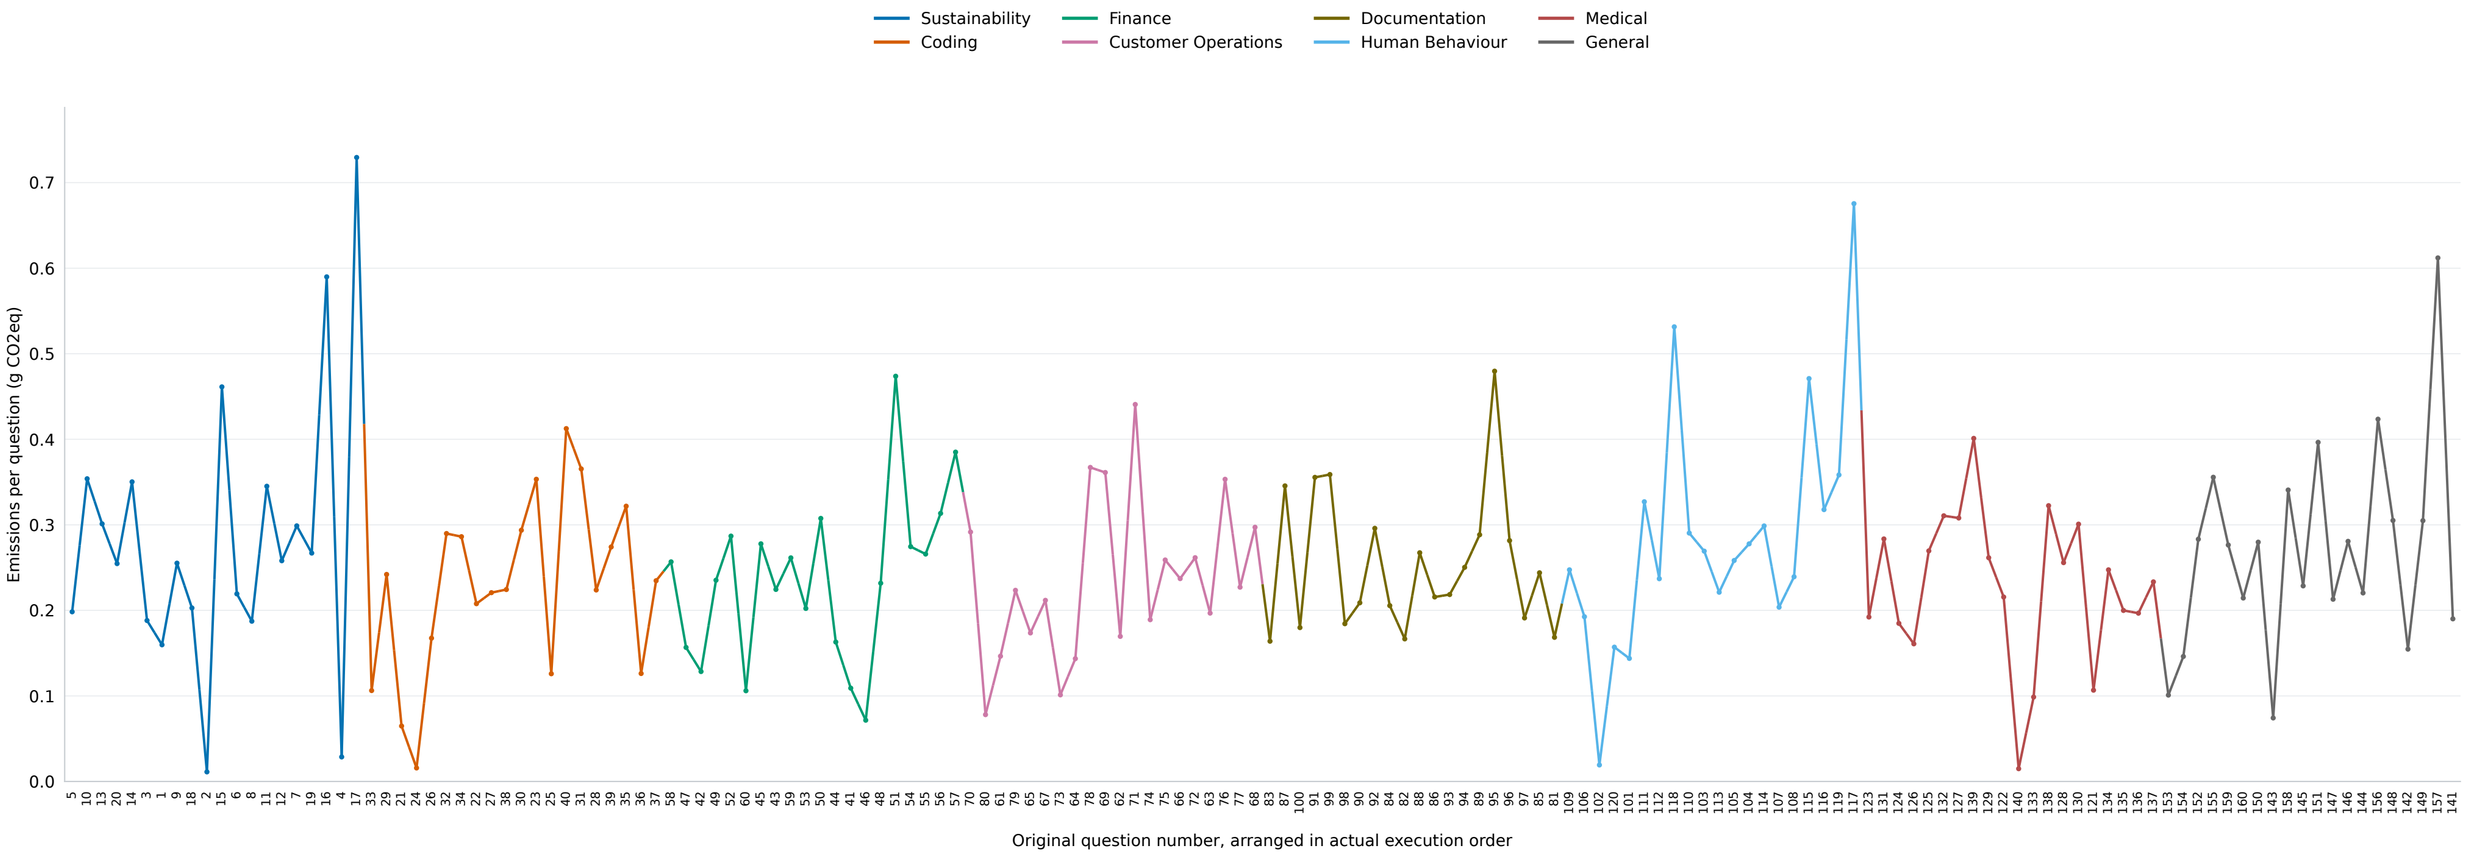

Labels are original questionbank serials (1-160). Colours identify topic sheets; colour changes halfway between neighbouring questions.

e4: question emissions in execution order

Labels are original questionbank serials (1-160). Colours identify topic sheets; colour changes halfway between neighbouring questions.

e5: question emissions in execution order

Labels are original questionbank serials (1-160). Colours identify topic sheets; colour changes halfway between neighbouring questions.

Gap = questions outside this chain between the previous turn and this turn, including turns from other chains.
N/A = first turn, with no preceding turn. Emissions are for the individual question, taken from original run records.

Per-question emissions across runs: Q1-Q32

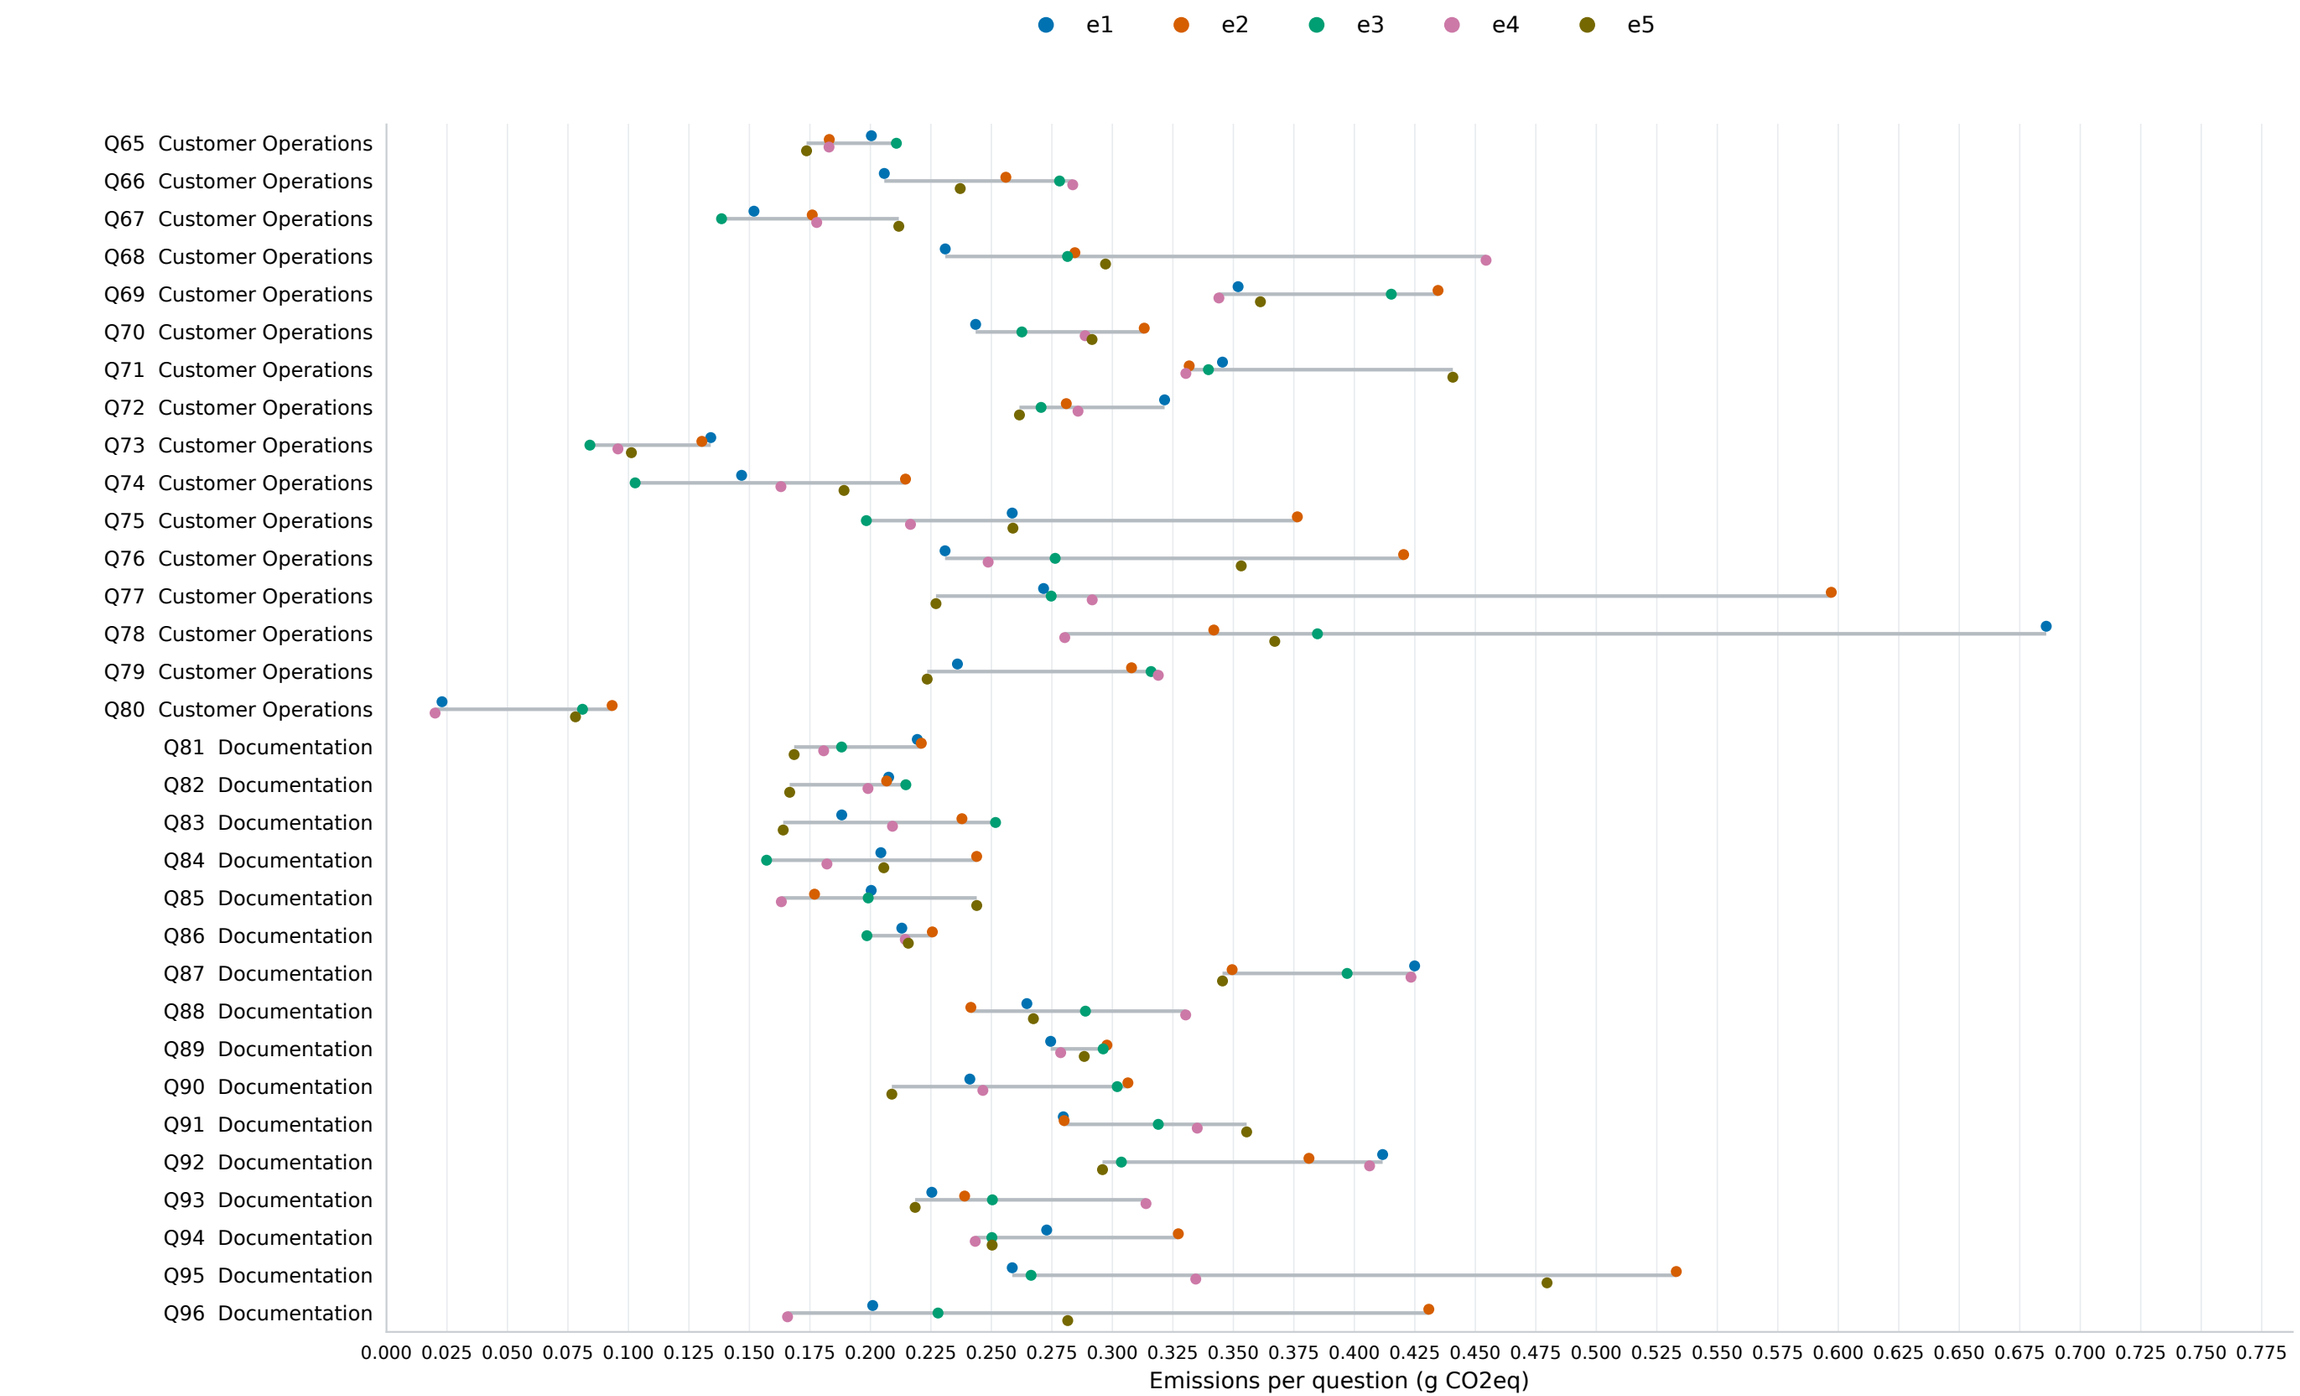

Original questionbank order. Each dot is one run; grey lines span minimum to maximum.
Small vertical offsets separate overlapping dots. All five pages use the same emissions scale.

Per-question emissions across runs: Q33-Q64

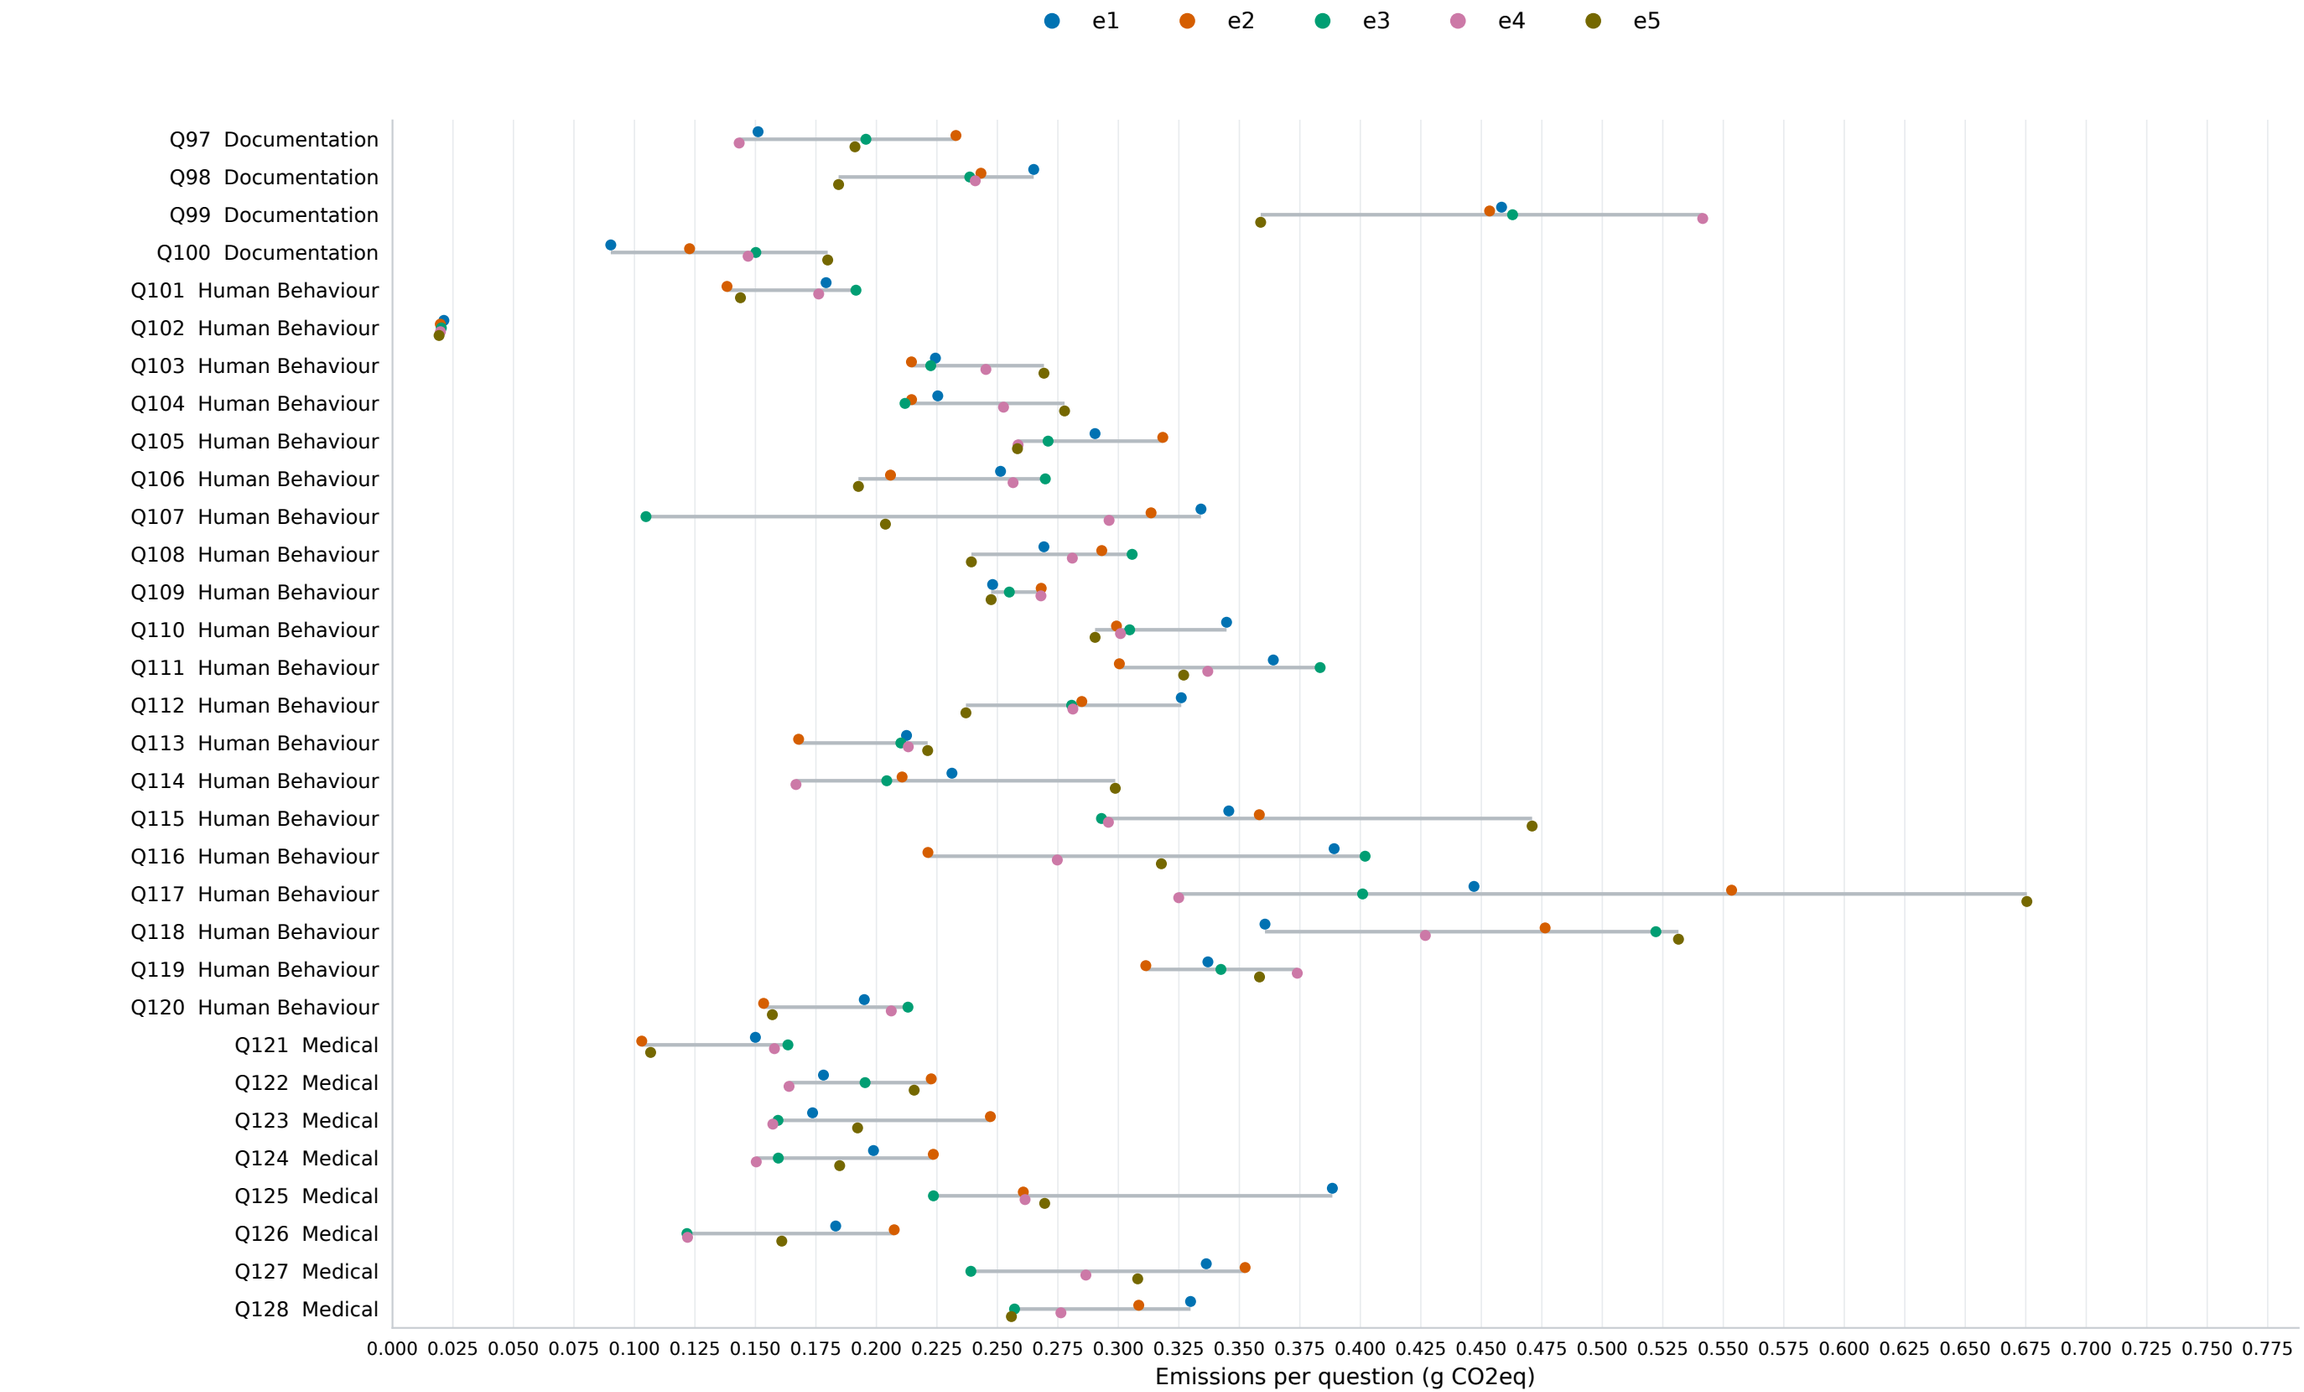

Original questionbank order. Each dot is one run; grey lines span minimum to maximum.
Small vertical offsets separate overlapping dots. All five pages use the same emissions scale.

Per-question emissions across runs: Q65-Q96

Original questionbank order. Each dot is one run; grey lines span minimum to maximum.
Small vertical offsets separate overlapping dots. All five pages use the same emissions scale.

Per-question emissions across runs: Q97-Q128

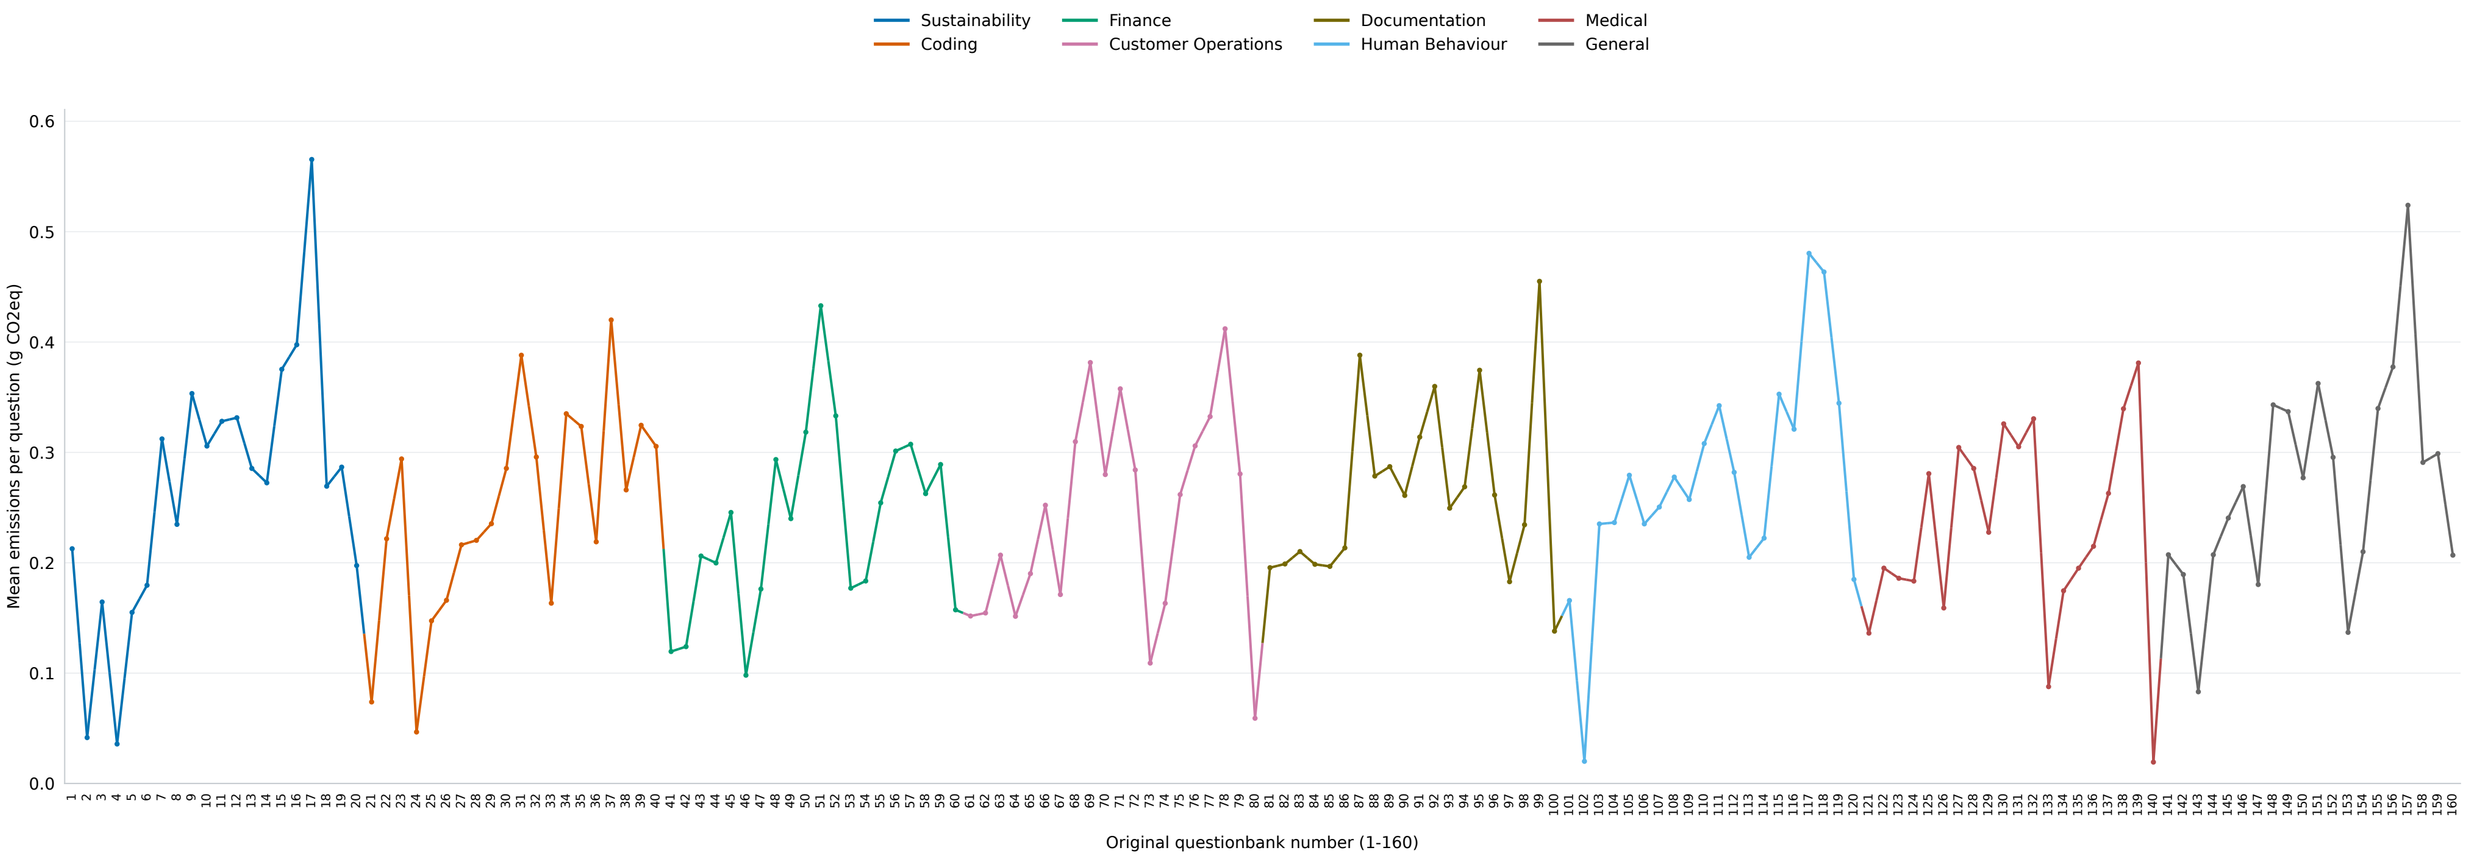

Original questionbank order. Each dot is one run; grey lines span minimum to maximum.
Small vertical offsets separate overlapping dots. All five pages use the same emissions scale.

Per-question emissions across runs: Q129-Q160

Original questionbank order. Each dot is one run; grey lines span minimum to maximum.
Small vertical offsets separate overlapping dots. All five pages use the same emissions scale.

Average question emissions across e1-e5

Each point is the arithmetic mean of the same question's recorded emissions across all five runs. Original questionbank order.
